DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

2. The disclosure is objected to because of the following informalities:
 - a) In page 2, line 1, it appears that "cupper" should be changed to --copper--.
 - b) In page 13, line 1, it appears that "Disclosed is a" should be --A--.
 - c) the abstract includes reference characters which are not enclosed within parentheses.

Reference characters corresponding to elements recited in the detailed description of the drawings and used in conjunction with the abstract should be enclosed within parentheses so as to avoid confusion with other numbers or characters which may appear in the abstract.

Appropriate correction is required.

Claim Objections

3. Claims 1-4 are objected to because of the following informalities:

Art Unit: 2839

In claim 1, lines 2-3, it is unclear whether applicant intended "a plug frame" to be the same as "a plug frame" in line 1. In line 3, the phrase "characterized in that" should be rephrased in proper idiomatic English.

In claims 2-4, line 1, before "plug frame", "A" should be changed to --The--.

In claim 2, lines 5-6, there is no antecedent basis for "the optical fiber cables."

Claims 3-4 have the defects of claims 1 and 2.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Iwano et al. (US 5,404,416).

The claimed invention reads on Iwano et al. as follows:

Iwano et al. discloses an optical plug [figure 15a, 16a and 16b] comprising:

- a plug frame [plug housing, 202];

Art Unit: 2839

- an optical component [201, 204] comprises a ferrule [201] for receiving an end portion of a core optical fiber [204] of a fiber optic cable [not shown for clarity, the cable can be seen in figure 12];

- the plug frame is configured as a one-piece component for floating supporting the ferrule therein [figures 16a and 16b];

- the plug frame having a first engagement portion [see an attachment] formed at one side (one end) of the plug frame for engaging with one optical component [not shown], and a second engagement portion [252] formed at the other side (other end) opposites the one end of the plug frame for engaging with an another optical connector component [206]; and

- the plug frame further having a first abutment portion [see attachment] for restricting moment of the ferrule in one direction and a second abutment portion [253] for restricting moment of the ferrule in opposite direction.

All the elements recited in the claims are read in the reference.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Valencia et al. (US 6,318,905) and Erdman et al. (US 5,394,497), show the alternate designs of the optical connector plugs comprising the ferrules floating supporting in the plug frames.
